July 15, 2010

Mr. Jerry Johnson, Owner
Blackhawk Energy Products
1609 Hunt Lane
Pleasantview, TN 37146

Mr. Johnson:

First of all, let me tell you what a pleasure it has been working with both you and Mr. Bobby Hamm regarding your product, the Blackhawk Energy Saver, over the past eight weeks. You have been nothing but straight forward and as upfront and honest with me about your product as could be expected, and I want you to know how much I appreciate your actions.

Your product, the Blackhawk Energy Saver, does all you said it would do and probably even a little more. The air conditioner here has never run as smoothly and quietly as it now does with the addition of your product. The florescent lighting comes on immediately now with the flick of the switch; as opposed to spitting and sputtering like they did prior to the installation of the Blackhawk Energy Saver. The computer system here at Cheatham Wildlife Management Area has never functioned at a higher level and even my old freezer runs more quietly now.

As you are aware, the headquarters of Cheatham Wildlife Management Area is at the end of a three mile dead end single phase line. I have been here at Cheatham for 22 years and have never had voltage above 109 until you installed the Blackhawk Energy Saver. It is a real difference maker!

Thank you for all you do, it does not go unappreciated.

Respectfully yours,

Randy Cromer, Area Manager
Cheatham Wildlife Management Area
